

## CHANGES IN TAJIMA DG15 BY PULSE 15.1.46.6273

The following is a list of the new features and improvements included in Tajima DG15 by Pulse since the previous official 15.1.42.6269.

### HARDWARE REQUIREMENTS

DG15 supports Windows 7, Windows 8, Windows 8.1 Windows 10 and is built on a 64-bit platform. Windows XP, Vista, and 32 bit-based operating systems are no longer supported.

**The following software issues have been fixed in this build:**

### STABILITY IMPROVEMENTS:

- Fixed an issue where the system hangs when adding the Advanced Border Type selection in text segment properties.
- Corrected a crash when accessing lock stitches in text properties.
- Resolved a crashing issue when using the reflect tool.
- Fixed an issue where software crashes in stitch edit mode.
- Crashing on importing excel file for patches has been corrected.
- Print preview crash with sequin file when print 3-D is enabled has been fixed.

### STITCH GENERATION ISSUES:

- Fixed complex fill stitch issues where run stitches were generating outside of fill stitch areas.
- Resolved an issue where the manual sequin tool was not generating sequin Icons.
- Corrected an issue for a sequin segment where sequin 2 was not generating correctly.

### DISPLAY ISSUES:

- Sequence view not displaying segment commands has been fixed.
- Japanese menu garbled text issue has been fixed.
- Corrected an issue after maximizing DG window where cursor was out of alignment.
- Fixed the display properties for a manual segment.
- Corrected an issue where sequins were not highlighted when using the manual edit sequin tool.
- Resolved an issue where simplified print did not print color names.
- Fixed an issue where the printed width of design files was inaccurate.

### FURTHER CORRECTIONS:

- Spooler will not start with no internet access when cloud settings is checked was fixed.
- Hidden backup file when overwriting (PXF, TBF, DST and TCF) will now be deleted when file is successfully saved.
- Fixed an issue where patches and templates wizards would not import XLS files.

- Fixed an issue when generating patches from two text segments did not generate correctly.
- Resolved an issue where multi-line text with drop shadow doesn't obey specified sew sequence.
- Fixed the edit envelope tool.
- Corrected a text color issue where text with fill and steel border does not update correct colors.
- Resolved an issue where the start point of a programmed run changes after saving and reopening file.
- Corrected an issue when converting to sequin split lines adversely changes start/stop points.
- Resolved an issue where text segments with center justify was not distributing letters correctly.

## NEW FEATURES/ENHANCEMENTS

- Added setting to force a trim after end lock stitch.
- Added new chenille lock stitch settings Tucking and Frilling.
- Japanese Release notes updated.
- Athletic Outline New is now a standard font.
